Schloder MGA 1033 Magnetic Field Generator- Analyzer

The MGA 1033 is a compact test system for generating and measuring magnetic fields in the frequency range from DC to 250 kHz. The integrated high-power amplifier allows the high field strengths required by numerous military and automotive standards to be easily achieved.

- With Self Calibration
- Integrated Spectrum analyzer
- Triaxial design- the fields are generated fully automatically in all three spatial axes - the test object no longer needs to be rotated.

Datasheet

ELF40 and ELF67 Edge Launch Connectors

- 2.92 mm and 1.85mm Interfaces
- Only the Top Ground is connected to the board
- 40 and 70 GHz Bandwidth
- Board Design Support Available
- Edge Launch
- Test Boards Available
- No Soldering Required

SIGNAL MICROWAVE HIGH FREQUENCY/SIGNAL INTEGRITY CONNECTORS

Signal Microwave is a manufacturing and consulting company located in Tempe, Arizona. The company was founded by Engineers with decades of experience and a proven track record of designing and building RF/microwave connectors and test boards. Our primary mission is creating solutions for the Signal Integrity/High Speed Digital market. The company is moving beyond the technology developed by traditional microwave connector manufacturers to create innovative new connector and PC board products. All products are fabricated and assembled in the USA and France using military grade materials and processes.

REXGEAR RTH Series Temperature Humidity Test Chamber

- Five sizes available starting from 64L to 1000L
- -72°C to +150°C models available (Optional higher ranges)
- 20% to 98% Relative Humidity (Optional higher ranges)
- Refrigeration system uses world known reliable components
- Communication Interface: USB, RS-232, RS485, LAN
- Multiple safety protection procedures

MICROLAMBDA'S YIG OSCILLATORS/SYNTHESIZERS/ FILTERS

For the RF and microwave designer, choices in components and instruments range from ordinary performance to the absolute best. And when it comes to oscillators, filters, and synthesizers, nothing beats MicroLambda's YIG-tuned technology. Our YIG devices and equipment offer the biggest names in the EW, ISM, and aerospace industry the lowest phase noise and superior multi-octave tuning capability.

BRENNAN ASSOCIATES LAUNCHES NEW WEBSITE

Brennan Associates is proud to announce the launch of its new website. Now you can view manufacturer catalogues, dynamically search for products and connect directly to manufacturers websites.

Additionally, we will feature several new products and keep you abreast of upcoming events in our territory.

Our monthly newsletter is here!

New Website is live now! Click on Picture above to visit the site.

UPCOMING EVENTS

2025 Manuever Warfighter Conference

Ft. Benning GA

**1 Karker Street
Ft. Benning GA 31905**

Start: September 9, 2025 7:30 AM EST

End: September 11, 2025 3:00 PM EST
